EDUCATION

<i>Ph.D.</i>	<i>Economics</i>	University of California, Riverside	Expected 2027
	Committee: Marcelle Chauvet (Chair), Dongwon Lee, Tae-Hwy Lee		
<i>M.S.</i>	<i>Computer Science</i>	University of California, Riverside	2026
<i>M.S.</i>	<i>Finance</i>	Harbin Institute of Technology	2014
<i>B.S.</i>	<i>Information and Computing Science</i>	Shenzhen University	2012

RESEARCH INTERESTS

Financial Economics; Machine Learning in Asset Pricing; Econometrics; Causal Inference

RESEARCH PAPERS

Firm-Level Tail Risk and Stock Returns: A Structured Mixture Density Approach.

Job Market Paper

This paper develops a structured mixture density network to forecast and decompose firm-level tail risk. Out-of-sample tests show improved forecast accuracy and lower subsequent returns for stocks with more severe predicted tail losses.

From Startups to Stocks: Text-Based Matching and Public Equity Returns.

Working Paper

This paper uses text embeddings and large language models to match Y Combinator startups to publicly traded U.S. firms. Portfolios of matched firms outperform the S&P 500. The findings suggest that startup business descriptions contain information relevant to public equity investment.

Financial Statements and the Predictability of Earnings Changes: Evidence from Neural Networks.

Working Paper

This paper examines whether deeper neural networks and model averaging improve the accuracy of earnings-change predictions. Portfolios constructed from model forecasts outperform the S&P 500, with higher accuracy linked to higher returns.

CEO Turnover and Stock Price Reactions: Evidence from China (with Ke Peng).

South China Finance, 2014(07), pp. 60–68.

This paper examines short-term stock price reactions to CEO turnover in Chinese listed companies using event study methodology and multivariate regression. The results provide evidence of information leakage and identify firm performance, dividend payments, and information asymmetry as factors associated with abnormal returns.

TEACHING EXPERIENCE

Instructor, UC Riverside:

ECON 101 Statistics for Economics

Summer 2025

Teaching Assistant, UC Riverside:

ECON 002	Introduction to Macroeconomics	<i>Spring 2025</i>
ECON 003	Introduction to Microeconomics	<i>Winter 2024 and Summer 2026</i>
ECON 101	Statistics for Economics	<i>(10 quarters)</i>
ECON 102	Intermediate Microeconomics	<i>Summer 2023 and Summer 2024</i>
ECON 104A	Intermediate Microeconomic Theory	<i>Summer 2025</i>
ECON 135	The Stock Market	<i>Spring 2026</i>

Teaching Development, UC Riverside:

Completed a two-quarter program covering inclusive teaching, active learning, curriculum design, and the development of a teaching philosophy. Pedagogy coursework completed in Winter and Spring 2025.

HONORS AND AWARDS

Dean's Distinguished Fellowship, University of California, Riverside	2021
Outstanding Graduate, Harbin Institute of Technology (Sole Recipient in the Program)	2014
Outstanding Graduate, Shenzhen University (Top 5% in the Program)	2012
Shenzhen University Scholarship, Top Prize (Top 1% in the Program)	2011
Tencent Scholarship, Top Prize, Shenzhen University (One of Four Recipients University-wide)	2010

PROFESSIONAL ACTIVITIES

Presentation:

Econometrics Seminar, UC Riverside Mar. 2026

Referee Service:

Journal of Business Cycle Research

WORK EXPERIENCE

Guosen Securities Company Limited

Dec. 2017 – Apr. 2019

Investment Analyst, Investment Banking Department

Shenzhen, China

- Wrote business and financial analysis sections for IPO prospectuses filed with Chinese securities regulators.
- Led commercial due diligence on high-value transactions across multiple sectors.
- Conducted valuation modeling (DCF, Comparables) for subsidiaries in pre-listing environments.

Dongxing Securities Company Limited

Feb. 2017 – Nov. 2017

Investment Analyst, Investment Banking Department

Shenzhen, China

- Advised companies on changes to ownership structures, accounting treatments, financial reporting processes, and compliance practices to meet listing requirements.
- Advised management on IPO planning, including timelines, listing venue selection, and the amount of capital to be raised.

PwC

Oct. 2014 – Feb. 2017

Senior Associate, Assurance

Shenzhen, China

- Extracted financial data from 1,000+ subsidiaries using SQL for audit automation and fraud detection.
- Built analytical tools (Python/VBA) to detect irregularities in revenue, expenses, and AR/AP entries.
- Led audits for listed and pre-IPO firms, ensuring full compliance with Chinese GAAP and reporting standards.

PROFESSIONAL QUALIFICATIONS

- CFA® Charterholder
- Chinese Institute of Certified Public Accountants (CICPA), Non-Practicing Member
- Legal Professional Qualification Certificate, China, 2016

SKILLS & TOOLS

- **Programming & Tools:** Python (PyTorch, NumPy, Pandas, Scikit-Learn), MySQL, Git, VS Code, MS Office
- **Analysis & Modeling:** Financial Modeling, A/B Testing, Causal Inference, Machine Learning, Econometrics
